

What is AzBAS?

AzBAS is an association of Arizona businesses committed to sustainable practices that promote • strong communities • successful businesses • a healthy environment and • sound public policy.

We meet four times a year for the primary purpose of holding in-depth dialogues among participants to share, learn from, challenge and test the sustainability practices that are in place – or in developmental phases – in our companies. The overarching goal is for Arizona businesses to step forward together and grow sustainability concepts and activities in Arizona’s diverse communities.

Our Primary Objectives:

- Build a platform and statewide venues to showcase sustainable businesses practices adopted by AzBAS members;
- Collaborate with other organizations committed to promoting sustainability in Arizona;
- Advance sustainability practices in the public policy arena;
- Convey to the State and its communities that Arizona’s business leaders support and encourage progressive, sustainable business practices; and
- Serve as a resource — a knowledge base — for others on how to create and adopt sustainable practices in their companies.

AzBAS’ Definition of Sustainability:

Sustainable business practices must address current needs in the context of how to support long-term economic vitality, environmental health, and strong communities. Sustainability is not an end state. It is a continuous challenge to be successful today in ways that establish the foundation for a better tomorrow.
